

ISA's Roof Mounted Post is one of the strongest posts available for anchoring large arrays to the roof. A single post can support up to 9 modules. Its large base allows the load to be well distributed in concrete roof structures. It can be used with all of the ISA Systems – including the WSS, PSS, and FSS Systems.

Physical Characteristics:

Post Dimensions:

3" Diameter x 12" High

6" and 8" Square Base

Rect. Bases Available for Glulam Beams

4 ea. Anchor Holes on 6" Sq. Pattern

Load Capacities:

Lift Capacity: 6000 Lbs.

Side Load Capacity: 2000 lbs.

at Top of Post

Material:

Tube and Base: 6061 Aluminum Fasteners:

300 Series Stainless

Roof Attachment Methods:

Accommodates up to 5/8" Anchor Bolts

To Wood Beams or Concrete Slabs

Strut to Post Attachment:

1/2" Bolt and 5/16" Piercing Screws

Warranty:

20 Years
